

QUALITY POLICY

Airey Taylor Consulting are Structural and Civil Engineers firmly committed to the quest for excellence.

The Quality Management System (QMS) adopted by Airey Taylor Consulting assures our stakeholders compliance with the requirements of ISO 9001 and relevant AS/NZS standards, industry and regulatory requirements as applicable.

The QMS allows for the setting of Quality objectives and targets at both the corporate and project delivery level and provides the framework to assure these objectives and targets are achieved, assessed and reviewed on a regular basis.

Airey Taylor Consulting objectives are to:

- Provide cost effective solutions service, tailored to the best interests, expectations and needs of our clients;
- Provide a service which complies with ATC and our clients specifications;
- Review and maintain our systems to continuously improve performance and quality and optimising our processes
- Act in accordance with laws and regulations
- Constantly adapt to technological development in our fields of work.
- To be an employer of choice by recruiting competent and qualified staff and providing regular training
- Co-operating with our interested parties based on our values of Accountability, Reliability, Respect and Innovation.

Executive management recognises that a complete commitment to quality throughout its operations is key to meeting this objective and, with the cooperation of all employees and other consultant specialists, has established a quality management system to meet external and internal needs.

This Policy is communicated to all employees, consultants and subcontractors who work for and with Airey Taylor Consulting. Airey Taylor Consulting ensures all staff have the right skills to guarantee our services meet the needs of our customers.

John Taylor
Quality Director
